

Panacea Rapid Marts for Sage Line 500 and Sage 1000

We have the answer...

Panacea has the answer. Our Rapid Marts extract the transactional data from your various companies, transform that data such that it is consistent and structured specifically for rapid reporting. We then make the data available through leading business intelligence toolsets from Business Objects or Microsoft that provide you with a friendly and intuitive means to analyse and manipulate the data for the purposes of reporting and planning.

Because we've spent many man-months trying to think of all the things you're most likely to want to report on to monitor the performance of your business and because we take input from every client who implements Panacea Rapid Marts and build it into the core product, you benefit from the shortest ever time between recognising that you need a solution and being able to utilise it to drive business success. And not only do you save time, you save money too. Rapid implementation and low consultancy costs mean that your return on investment is quick and assured.

do you

- ◀▶ Run Sage Line 500 or 1000?
- ◀▶ Have multiple companies?
- ◀▶ Want a single, reliable view of your business?
- ◀▶ Need reporting AND planning across companies?
- ◀▶ Want value and a rapid ROI?

Sage Line 500 and 1000 are powerful, proven ERP platforms that drive real business value. But if there's one weakness of these platforms it's that it hasn't always been easy to gain a detailed understanding of your business's performance across multiple Sage companies.

Rapid Marts benefits

Panacea Rapid Marts deliver enterprise-class business intelligence and planning tools at a mid-market price and with the fastest ever implementation time. If you're dreading the next budgeting round or simply need to gain better insight into your multiple business units then contact us now – you could be benefiting from true business insight sooner than you might think.
